## Upgrade Instructions

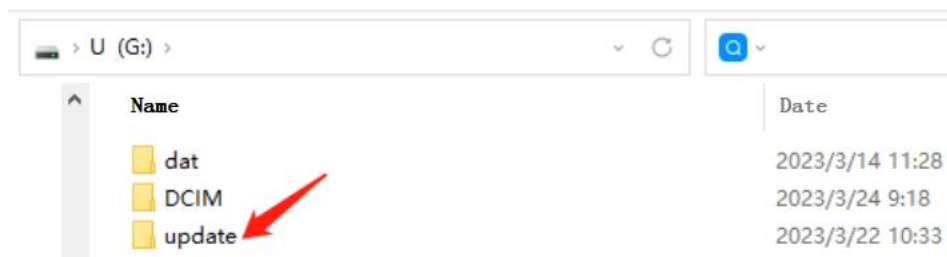

**Note:** The upgrade instructions will instruct users to upgrade their TC005 to Version 1.4.7.3 (103).

### What's New:

1. Added the unit of "inch" for distance in the **Setting >> Measure Parameters** section.
2. Added a screen recording feature.
3. Added a new feature that allows users to play the recorded videos on a Windows computer via the latest TDView software. (To download the latest TDView software, go to <https://www.topdon.com/pages/pro-down?fuzzy=TC005>)
4. Other improvements for better user experience.

### How to Upgrade Your TC005 Device?

1. Turn on TC005, and go to **Setting >> System Setting >> USB Mode** to switch to the **USB Disk** mode.
2. Connect TC005 to your Windows computer with the supplied USB cable, then go to <https://www.topdon.com/pages/pro-down?fuzzy=TC005> and download the upgrade package file ([IRPT\\_EMD\\_C200\\_V1473\(103\)-TC005](#)) to the root directory of the TC004 SD card.
3. Unzip the file, and rename it as "update". (See figure below).

4. Press and hold the right button of the device for 10 seconds; then press and hold the left button while still holding the right button; release both buttons until the following update page appears on the device.

5. Use the Move Up / Down button to select update on the screen, press and release the OK button, and wait for 10 seconds until the device automatically turns off.
6. Press and hold the power button to turn on TC004; go to **Setting >> System Setting >> Device Information**; if the following information displays, it indicates the upgrade is successful.
