ArtiDiag Pro

Featuring 31 maintenance service functions and comprehensive system scanning for over 100 makes and models, the ArtiDiag Pro was made for versatility. The Bi-Directional control feature helps users locate and resolve vehicle problems easier and faster. It supports ECU coding for customers who need to perform coding work in the car. The AutoVIN feature can automatically identify key vehicle information to diagnose and repair vehicles easier. A comparative data display can show up to 4 data streams on a single interface, allowing users to evaluate performance with comparative data and make accurate, efficient decisions.

FAQs

Brief

Bi-Directional Control - Target The Problems Easily

The ArtiDiag Pro car scanner can get access to vehicle-specific subsystems and component parts that drive the actuators to perform a specific function.

This determines the integrity of the system or parts, allowing users to analyze and locate the faults more accurately. Work on lights, door locks, fuel injectors, fuel pumps, coolant pumps, windows, windshield wipers, EVAP and more.

Question

System halts when reading the data stream. What is the reason?

Answer

Features

It may be caused by a slackened connector. Please turn off the tablet, firmly connect the connector, and switch it on again.

Question

31 Maintenance
Services

Screen flashes at engine ignition start.

Answer

Normally caused by an electromagnetic disturbance.

FAQs

Specs

Question

What to do if the system fails to start auto VIN detection?

Answer

Features

Please check the following possible causes:

- Whether the tool is properly connected to the vehicle's DLC.
- Whether the device is connected to Internet successfully.

Note: This function varies by vehicle manufacturers and years, not applicable to all cars.

Question

How to upgrade the system software?

Answer

What's In
The Box?

1. Power the tool on and ensure a stable internet connection.
2. Tap "Settings" on the Home Menu, select "About" -> "Version", and tap "Detect the System Version" to enter the system upgrading page.
3. Follow the on-screen instructions step by step to finish the process. It may take a while to finish the upgrade depending on the internet speed. The tool will automatically restart and enters the Home Menu when the upgrade is finished.
